About BMC

Balco Medical Centre (BMC), a 170-bed state-of-the-art tertiary care Oncology facility, is the first flagship initiative of Vedanta Medical Research Foundation (VMRF) and is based in Naya Raipur, Chhattisgarh. VMRF, a non-profit organization, is an initiative of Vedanta Resources and is base Bharat Aluminium Company Ltd. (BALCO) to contribute towards prevention of cancer and its related illnesses. BMC is one of India's leading cancer care hospitals and has provided quality cancer care to more than 30,000 patients since inception. The tertiary cancer centre has a team of multi-disciplinary oncologists, specialist nursing, oncology pharmacy, optimised chemotherapy daycare, state of the art radiotherapy machines, modular operation theatres, critical care unit, BMT unit, modern transfusion medicine department, and the latest in cancer diagnostics.

BALCO Medical Centre is on a mission to help create a cancer-free society, dedicating its expertise and resources to address existing gaps in domestic cancer treatment, awareness, infrastructure and expertise. Set up under the aegis of the VMRF and backed by the Anil Agarwal Foundation (AAF), the institution is actively making a difference to the lives of lakhs of people through quality, accessible healthcare. It is one of the preferred facilities in India for advanced radiation therapy, brachytherapy, nuclear medicine, surgeries, chemotherapy, immunotherapy, blood-related disorders, plastic and reconstructive surgery, and pain & palliative care. Along with cancer treatment, all patients at BALCO Medical Centre also benefit from psychological, nutritional and physical therapy, as well as membership of various patient support groups for emotional support.

We at BMC believe in reaching out to the community for cancer awareness, screening and onsite diagnosis. Our cancer screening camps are routinely organized at nearby villages, health centers and community centers along with a cancer detection van with a dedicated staff are equipped with diagnostic facilities for onsite screening.

Last year, BMC signed an MoU with Tata Memorial Centre, Mumbai for the exchange of knowledge, and enhancement of skills, capabilities and core practices. BMC will leverage TMC's expertise and decades of experience in cancer treatment for developing best-in-class technical and medical guidelines. With this association, TMC has empanelled BMC as a referral centre for patients from Chhattisgarh, and neighbouring states.

Though the hospital is in Naya Raipur, Chhattisgarh, it is rapidly becoming a centre of choice for cancer treatment for people from Odisha, Madhya Pradesh, Jharkhand, and even from some parts of Maharashtra and Andhra Pradesh. For more information, visit www.balcomedicalcentre.com

CANCER
CONCLAVE
2023 17th 18th
JUNE

 Hotel Mayfair Lake Resort,
Naya Raipur, Chhattisgarh

Theme :
Cancer care closer to home -
Shifting Paradigms

Dear Colleagues,

The Balco Medical Centre cordially invites you to the **Inaugural Cancer Conclave 2023** – the theme being “**Cancer care closer to home – Shifting Paradigms**” as we serve the local population.

The meeting will be held at **Hotel Mayfair Resort, Naya Raipur, Chhattisgarh on 17th & 18th June 2023.**

Two pre-conference workshops are planned for **17th June : Live surgery focusing on breast cancer at Balco Medical Centre, Naya Raipur and KEVAT-A Patient Navigation Program at Balco Medical Centre, Training Room, 1st Floor.**

The meeting will help busy clinicians from all over the region to get updated on the best available evidence in oncology, thereby translating into better overall patient care. Renowned International and National faculty members will cover the topics in a very focused and succinct manner.

The target audience for the meeting is surgical oncologists, radiation and medical oncologists, epidemiologists, preventive oncologists, physicians from allied specialties, general medicine practitioners and also trainees in the above specialties.

We look forward to welcoming you at this annual event.

Regards,

Dr. Bhawna Sirohi

Medical Director,
BALCO Medical Centre,
Naya Raipur, Chhattisgarh

CANCER
CONCLAVE
2023 17th 18th
JUNE

 Hotel Mayfair Lake Resort,
Naya Raipur, Chhattisgarh

Theme :
Cancer care closer to home -
Shifting Paradigms

Day 1 | Saturday 17th June 2023

TRACK 1 | Live Surgery Workshop

Venue : Balco Medical Centre, Naya Raipur

Dear Colleagues,

The BMC Conclave workshop with live demonstration of cases will give a deep insight in current management of breast cancer. It will be practice changing for surgeons as it will clear doubts on patient selection for upfront surgery vs. neoadjuvant chemotherapy, targeted therapy, immunotherapy followed by reconstruction techniques.

Light will be thrown in recent trends in management of axilla like sentinel lymph node mapping and oncoplastic breast surgery which has shown to improve quality of life in patients post surgery.

There will be case based discussions on real world scenarios for breast cancer management by doyens in the field. Every moment of workshop would be enlightening.

So would request all to join and take a deep dive in subject.

Regards,

Dr. Mou Roy

Director, Surgical & Clinical Oncology,

Day 1 | Saturday 17th June 2023

TRACK 2 | Patient Navigation Workshop

Venue : Balco Medical Centre, Training Room, 1st Floor

Dear Colleagues,

Patient Navigators are crucial for a cancer patients journey. Patients may need multiple procedures at the time of diagnosis followed by surgery, chemotherapy, radiotherapy or other supportive treatments. They guide patients through the system in a cancer centre, hence ensuring that they receive timely effective and efficient care. They help patients and their families understand diagnoses, treatment options, and available resources. The aim of initiating a patient navigation program in oncology is to create a taskforce trained to handhold cancer patients and help them navigate through the cancer continuum of care.

The program aims to bring about attitudinal change in concept of care with a common vision and mission to offer best socio-economic support and strike equitable balance with limited resources. This will also build knowledge base in patient navigation in oncology with adept understanding of medical terminologies; assimilate understanding on cancer and its treatment protocols, supportive care options, including risks and benefits of integrative therapies, rehabilitation, funding options, insurance and other patient allied services; along with honing skill set for developing and implementing patient navigation programs in hospitals.

The workshop will include jam boards and discussions to drive excellence in cancer patient care journey.

Mrs. Nishu Singh Goel

Program Head, Kevat,
 Tata Memorial Centre, Mumbai

Day 2 | Sunday 18th June 2023

TRACK 4 | Physician Connect

Venue : Mayfair Lake Resort, Naya Raipur

Dear Colleagues,

Cancer cases and deaths have steadily increased in India. Each year, more than one million Indians are diagnosed. The statistics tell us that 1 in 5 of us will be diagnosed with cancer in our lifetime. The 5-year survival for cancer in central India and North East India is poor and this is likely related to late stage of diagnosis, lack of access to cancer care, delayed referrals or socio-economic challenges. 70-80% of patients presenting to us present in Stage III-IV. To change this, we all need to work together as a team.

Cancer diagnosed early are curable, cost less to treat and the duration of treatment for the patient is also shorter.

BMC is part of the National Cancer Grid and all treatments undertaken are standardized uniform protocols.

We would like to engage with you to see how we drive cancer prevention, early diagnosis and prompt treatment for patients living in our part of the world.

Regards,

Dr. Bhawna Sirohi

TRACK 5 | Audit & Clinical Research

Venue : Balco Medical Centre, Training Room, 3rd Floor

Dear Colleagues,

“Research CURES Cancer” To drive solutions for our patients, we need to make cancer research a priority as part of cancer care continuum of early diagnosis, prevention and treatments which are cost-effective. Clinical audit is a way of finding out whether what we are doing is right and follows the current best practice.

Research creates new knowledge about what works and what is best. Both are important components of delivering care for our patients.
