Keynote Speakers

Dr. Alexey Danilov

Professor, Department of Hematology,
Co-Director, Lymphoma Center, City of Hope

Alexey Danilov, M.D., Ph.D., chose oncology as a career because of its breadth and potential. Oncology, he says, “touches all areas of general medicine” and is a most exciting field because of the many new treatments now emerging.

A board-certified clinician and talented researcher, Dr. Danilov focuses on blood cancers, including chronic lymphocytic leukemia and many forms of lymphoma. He is a Leukemia & Lymphoma Society Scholar in Clinical Research.

A native of Russia, Dr. Danilov earned his medical degree and Ph.D. at Yaroslavl State Medical Academy. He continued his training with a residency at Brown University in Providence, Rhode Island, and a fellowship at Tufts Medical Center in Boston.

In his role of an Associate Director, Toni Stephenson Lymphoma Center at City of Hope, Dr. Danilov directs an effort in experimental therapeutics in B-cell malignancies. He received peer-reviewed funding from the National Cancer Institute, Leukemia and Lymphoma Society, American Society of Hematology, and Lymphoma Research Foundation, and serves as Translational Medicine Chair of the SWOG Lymphoma Committee, thus participating in drug discovery on a global scale.

Keynote Speakers

Dr. Alan Pierre Zausner Skarbnik

Director, Experimental Therapeutics,
Malignant Hematology, Novant Health

Alan Skarbnik, MD, serves as the director of the lymphoma and chronic lymphocytic leukemia program and director of experimental therapeutics, malignant hematology at Novant Health. Prior to joining Novant Health, Dr. Skarbnik served as the director of the chronic lymphocytic leukemia program at John Theurer Cancer Center at Hackensack University Medical Center. As an expert in chronic lymphocytic leukemia (CLL) and lymphomas, his research focuses on using immunotherapy to improve outcomes of autologous stem cell transplantation for patients with high-risk blood cancers. Dr. Skarbnik is a member of the medical advisory board to the CLL Society and has over 90 peer-reviewed research manuscripts and abstracts in the fields of lymphomas, CLL and stem cell transplantation
