5TH ANNUAL INTERNATIONAL REVIEW ON GI CANCERS

22nd - 24th JULY 2022

Dear Colleagues,

GKCT brings to you the 5th Edition of Annual Review in Gastrointestinal Cancer to be held on 22nd-24th July 2022 on a Virtual Platform.

The primary goal of this meeting is to guide practicing physicians on integrating the best and most current evidence into day-to-day routine care for patients with GI cancers. This meeting brings a practical perspective on how to optimize multidisciplinary care for some of the more complex clinical management decisions. Topics discussed include locoregional modalities, the role of minimally invasive procedures, and state-of-the-art treatment.

As we are aware chemotherapy dependency has maintains its validity in several gastrointestinal cancers and continues to be successfully explored, especially in academic trials. However, a number of biomarkers currently guide treatment decisions for patients with gastrointestinal neoplasms. Major technological advances in genomics have made it possible to identify critical genetic alterations in cancer, rendering oncology well along the path to “personalized cancer medicine”.

Image-guided surgery & minimally invasive treatment has evolved over the past several decades, which has led to reduced local recurrence rates and improved survival outcomes. The approach to diagnosis, staging, and selection of appropriate treatment modalities has become a multidisciplinary effort combining interventional endoscopy, surgery, and radiology tools needs to be discussed and implemented in our practice.

This meeting focuses on case-based and didactic presentations from national international experts in the treatment of the whole spectrum of gastrointestinal (GI) cancers, including esophageal, gastric, hepatocellular, pancreatic, small bowel, bile duct, anal and colorectal, and gallbladder. Our year in review session, hall mark surgical video sessions and case based panel discussion will provide an overview of exciting new research in the area of gastrointestinal tumours that may establish the stage for an innovative personalized management and precision medicine modalities for individualized care.

We are sure our attempt in understanding the various therapeutic interventions will pave the way for improved patient outcomes. We look forward to your active participation.

ABRIDGE PRESCRIBING INFORMATION (Tecentriq®) SUMMARY OF PRESCRIBING INFORMATION:

Generic name: Atezolizumab Injection Brand Name: Tecentriq® Composition: Active ingredient: Atezolizumab, Tecentriq is supplied as a single-use vial containing preservative-free, colorless to slightly yellow solution, at an active ingredient concentration of 60 mg/mL, as follows: 14 mL vial containing a total of 840 mg atezolizumab 20 mL vial containing a total of 1200 mg atezolizumab

Indications: Tecentriq is indicated for the treatment of patients with locally advanced or metastatic unresectable carcinoma after prior chemotherapy or who are considered cisplatin ineligible. Non-small cell lung cancer: Tecentriq is also indicated for the treatment of patients with locally advanced or metastatic non-small cell lung cancer (NSCLC) after prior chemotherapy. 2. Tecentriq in combination with bevacizumab, paclitaxel and carboplatin, is indicated for the first-line treatment of adult patients with metastatic non-squamous non-small cell lung cancer (NSCLC). In patients with EGFR mutant or ALK-positive NSCLC, Tecentriq, in combination with bevacizumab, paclitaxel and carboplatin, is indicated only after failure of appropriate targeted therapies. 3. Atezolizumab in combination with nab-paclitaxel and carboplatin, is indicated for the first-line treatment of patients with metastatic non-squamous NSCLC whose tumors have a PD-L1 expression ≥ 50% tumor cells or ≥ 10% tumor infiltrating immune cells and who do not have EGFR or ALK genomic tumor aberrations. Small cell lung cancer: Tecentriq, in combination with carboplatin and etoposide, is indicated for the first-line treatment of patients with extensive-stage small cell lung cancer (ES-SCLC). Triple-negative breast cancer: Tecentriq, in combination with nab-paclitaxel, is indicated for the treatment of patients with unresectable locally advanced or metastatic triple-negative breast cancer (TNBC) whose tumor have PD-L1 expression ≥ 1%, and who have not received prior chemotherapy for metastatic disease. Hepatocellular carcinoma: Atezolizumab, in combination with bevacizumab, is indicated for the treatment of patients with unresectable or metastatic hepatocellular carcinoma (mHCC) who have not received prior systemic therapy. Type of dosage form: Tecentriq is available in single use vials as Concentrate for solution for infusion. Dosage and Administration: Tecentriq must be administered as an intravenous infusion under the supervision of a qualified healthcare professional. Do not administer as an IV push or bolus. The initial dose of Tecentriq must be administered over 60 minutes. If the first infusion is tolerated, subsequent infusions may be administered over 30 minutes. The recommended dose of Tecentriq in monotherapy or combination therapy is 840 mg administered by IV infusion every 2 weeks, or 1200 mg administered by IV infusion every 3 weeks. Tecentriq monotherapy 2. NSCLC: In NSCLC, 2L, 3L, 4L, 5L, 6L, 7L, 8L, 9L, 10L, 11L, 12L, 13L, 14L, 15L, 16L, 17L, 18L, 19L, 20L, 21L, 22L, 23L, 24L, 25L, 26L, 27L, 28L, 29L, 30L, 31L, 32L, 33L, 34L, 35L, 36L, 37L, 38L, 39L,
