Lung Cancer

Leaps and Bounds

22nd - 23rd October 2021 | 06:00 pm - 09:30 pm

Dear Colleagues,

Anti-PD1/PD-L1 and driver mutation directed therapies have been a revolution in the field of advanced lung cancer by improving the prognosis. This has given hope to a large population of patients who are potential long-term survivors.

Nevertheless, with the overlapping approvals of IO treatment and new targeted therapies for oncogenic altered mutation it has become difficult to navigate which treatment will benefit whom. Optimal treatment selection using validated biomarkers are key to improving the patient outcomes.

Keeping in mind this practice changing evidence in lung cancer and fast progressing research that are providing new answers, we at Onconxt invite you for **"Lung Cancer: Leaps and Bounds"**. This meeting will be held on **22nd & 23rd October 2021 on virtual platform.**

We aim to review the landscape of impactful and complex evidence in Lung Cancer through focused talks and interactive panel discussions.

We request you to share your opinions, dilemmas and if possible clinical scenarios which you want us to get discussed during this meeting. You can write to us on **onconxtedu@gmail.com**

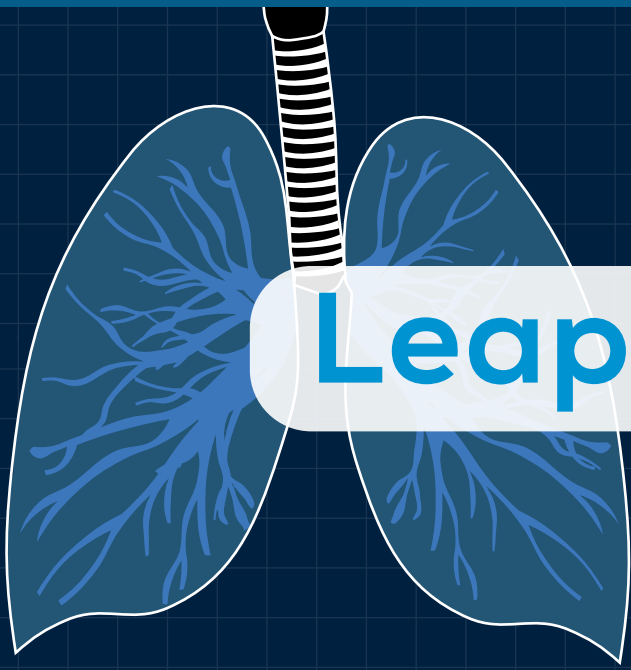

We have various sponsorship opportunities for pharma partners and we request you to get in touch with our event manager and discuss the same.

With Best Regards,

Dr. Nilesh Lokeshwar

Dr. Tejinder Singh

Dr. Adwaita Gore
