GRAND ROUNDS IN ONCOLOGY 2022

2ND TO 4TH
SEPTEMBER

Dear colleagues

It gives us great pleasure to invite you for the Grand Rounds in Oncology 2022, to be hosted from the **2nd to 4th September 2022** by the Oncology Group of Pune (OGP). **This conference will be held at Hotel Conrad, Pune**

OGP is a conglomerate of 120+ members practicing oncology in and around Pune. Most are life members, bonded together with monthly meetings for mutual knowledge exchange, data sharing and joint problem solving in this challenging field of ours.

The Grand Rounds in Oncology 2022 promises to be two and a half days of an academic gourmet, and we have taken the trouble of curating content which is very boots-on-the-ground and real world relatable. The format is in the form of case presentation and medical sleuthing, and the detectives in this oncological “who-done-it” are the best of the best from all over the country, a heady mix of the famous and respected and the up and coming; dashing current and future leaders in oncology. Equal emphasis is given to surgical, medical and radiation oncology, as well as histomolecular pathology and nuclear medicine. In short, there is something for everyone associated with cancer diagnostics and therapeutics.

Pune, this Oxford of the East, is salubrious in September. Our monsoons are fading and the temperature is in the late twenties. Lord Ganesha will be visiting and the air is festive.

Ladies and gentlemen, Pune welcomes you with open arms.

Regards,
Organising Team

GRAND ROUNDS IN ONCOLOGY 2022

2ND TO 4TH
SEPTEMBER

INSTRUCTIONS FOR PRESENTERS: POSTERS DISPLAY

We look forward to seeing your poster on display during the meeting and thank you in advance for your co-operation in following these guidelines.

❖ ONSITE ATTENDANCE

- As presenting author, your presence is requested onsite in Pune.

❖ PREPARING YOUR POSTER MATERIAL

- Printing and hanging your Poster on the related Poster board is mandatory for all delegates who have had their abstract accepted for Poster presentation.
- Please add clearly the FINAL ACCEPTANCE NUMBER (FAN) to your poster.
- If you don't know your FAN, please check in poster list in the programme.
- It is strictly mandatory that the first and presenting author includes a disclosure statement on the Poster, even if only to confirm that if he/she has no conflicts of interest to declare. Co-author disclosures are not mandatory on the Poster.
- Feel free to add your e-mail address to the poster: This will allow other attendees to contact you in case of any questions.
- If the study has received funding, this must also be acknowledged on your poster: "Study sponsored by..."
- Please rename your file before the upload as: "FINAL ACCEPTANCE NUMBER (FAN)- Presenter's name" To avoid any compatibility problems, do not use special characters (e.g., «, Ö, Ø, ñ, ε, ®, ý}, {etc.) in the file name.
- QR (Quick Response), AR (Augmented Reality), text key codes are allowed. However, although OGP accepts that these may go to a commercial/branded website, we suggest avoiding links to websites containing blatant

product advertising. If you intend adding a QR, AR or a text key code to your poster, please add the following disclaimer notice: "Copies of this poster obtained through QR, AR and/or text key codes are for personal use only and may not be reproduced without written permission of the authors".

- Posters may not present a commercial bias or use clearly identifiable commercial templates. The Grand Rounds in Oncology 2022 reviewers will be responsible for advising the Scientific Committee of any inappropriate commercial bias, promotion or branding unless clearly stated in a balanced and objective manner.

❖ DESIGN

- Layout:
 - ◆ Format of the Poster is horizontal (landscape). The maximum Poster size is 190cm width x 90cm height.
 - ◆ Keep data on the slide simple and ensure a logical order of the content. A clear and well-structured arrangement is the most attractive and the easiest to read.
- Text:
 - ◆ Your guiding principle should be "As much as necessary, as little as possible". The text should be concise and to the point, key facts may be highlighted.
- Colours:
 - ◆ Colours should be used sparingly. Choose colour combinations that make your text easy to read (preferably dark background – light fonts; avoid red and green).
- Images:
 - ◆ It is recommended that you collect your illustration material well in advance. Do not select too many images and concentrate on those which support your key points and conclusions optimally.

Abridged Prescribing Information - UJVIRA™

PHARMACEUTICAL FORM AND COMPOSITION: UJVIRA™ Injection is lyophilized powder for concentrate for solution for infusion, 160 mg single dose lyophilized powder for infusion & 100 mg single dose lyophilized powder for infusion. **THERAPEUTIC INDICATION:** UJVIRA™ is indicated for the treatment of patients with HER2-positive, unresectable locally advanced or metastatic breast cancer who had previously received trastuzumab and a taxane, separately or in combination. It is also indicated for the adjuvant treatment of patients with HER2-positive early breast cancer with residual invasive disease in the breast and/or lymph nodes after receiving neo-adjuvant taxane-based and HER2-targeted therapy. **POSOLGY AND METHOD OF ADMINISTRATION:** UJVIRA™ should be administered as an intravenous infusion. Do not administer as an intravenous push or bolus. It should be given at a dose of 3.6 mg / kg body weight with 3 weekly intervals (21 Day cycle). The first dose should be administered over 90 minutes intravenous infusion. Patients should be observed for fever and chills or other symptoms related to infusion. **SUBSEQUENT DOSES:** If the previous dose was well tolerated, the 3.6 mg / kg body weight dose can be administered over 30 minutes intravenous infusion. If dose reduction is done due to drug related adverse effect, then the dose should not be re-escalated in subsequent cycles. **CONTRAINDICATIONS:** There are no known contraindications to UJVIRA™. **SPECIAL WARNINGS AND PRECAUTIONS FOR USE:** Infusion-related reactions and hypersensitivity characterized by one or more of the following symptoms have been reported with trastuzumab emtansine- flushing, chills, pyrexia, dyspnoea, hypotension, wheezing, bronchospasm and tachycardia. It is recommended to monitor serum transaminases and bilirubin prior to initiate the treatment with UJVIRA™ as hepatotoxicity risk is associated. UJVIRA™ administration may lead to reductions in left ventricular ejection fraction. Evaluate left ventricular function in all patients prior to and during treatment with UJVIRA™. It is recommended that platelet counts are monitored prior to each trastuzumab emtansine dose. Patients with significant thrombocytopenia should be monitored closely while on trastuzumab emtansine treatment. **PREGNANCY:** UJVIRA™ should be avoided during pregnancy as it can cause fetal harm when administered to a pregnant woman. **NURSING MOTHERS:** Women should discontinue breast-feeding prior to initiating treatment with trastuzumab emtansine. Women may begin breast-feeding 7 months after concluding treatment. **ADVERSE EVENTS:** Some reported adverse events included vomiting, pyrexia, cough, thrombocytopenia, aspartate aminotransferase increased and pain. **STORAGE:** Store vials between +2°C and +8°C. **RECONSTITUTED SOLUTION:** It is recommended to use immediately. If not used, it can be stored between +2°C and +8°C up to 24 hours. Do not freeze. Please refer to the full Prescribing Information before using UJVIRA™
