

# Student Education Program on Prostate cancer (STEPP)

One of it's kind Case Simulation with self Assessment based Learning Module

Module 1 starts from Fri, 19<sup>th</sup> Dec, 2021

Module 2 starts from Sun, 16<sup>th</sup> Jan, 2022

Module 3 starts from Fri, 13<sup>th</sup> Feb, 2022

Module 4 starts from Sun, 6<sup>th</sup> Mar, 2022

Every 75 Mins. Module will be active for 30 days.

Participants can attend the module at their convenient time

One of it's kind Case Simulation with self Assessment based Learning Module

Module 1 starts from Fri, 19<sup>th</sup> Dec, 2021

Module 2 starts from Sun, 16<sup>th</sup> Jan, 2022

Module 3 starts from Fri, 13<sup>th</sup> Feb, 2022

Module 4 starts from Sun, 6<sup>th</sup> Mar, 2022

Dear Colleagues,

In recent years, prostate cancer management has become increasingly complex with new surgical techniques, radiotherapy, and the approval of several second-generation anti-androgen therapies. Moreover, clinical trials of targeted therapies, immunotherapies, and novel combination regimens are underway across various forms of the disease.

These case-based discussions highlight evidence from key trials on next-generation androgen-targeting agents, the role of DNA damage-response mutations, biomarker testing and the potential role of innovative targeted therapy, and advances in immunotherapy for prostate cancer. By providing a "roadmap" to the multiple pathways of prostate cancer management, this program serves as a resource for postgraduate students interested in the present and future applications of new science in patient care.

Upon completion of this activity, participants should be better able to:

- Develop personalized, evidence-based treatment plans for patients in different prostate cancer settings with considerations of tumor, patient, and treatment-related factors
- Discuss newer advances in surgical and radiotherapy techniques.
- Discuss the clinical outcomes, latest guidelines, and expert recommendations for selection and sequencing of approved therapies, including hormonal, anti-androgen, cytotoxic, and bone-directed therapies, alone or in combination for non-metastatic and metastatic prostate cancers
- Assess the role of genetic testing for treatment decision-making through the prostate cancer disease continuum

## Student Education Program on Prostate cancer (STEPP)

### Expert Faculty

**Dr. Jagdeesh N Kulkarni**

Director Minimal Invasive & Robotic Surgery,  
Prof & Head, Dept of GU/GYN Oncology,  
ACI - Cumballa Hills Hospital, Mumbai

**Dr. Tejinder Singh**

Sr. Consultant Medical Oncologist,  
Apollo Hospitals, Mumbai

**Dr. Vivek Venkat**

Sr. Consultant - Urology & Robotic Urology  
Nanavati Max Super Speciality Hospital  
Mumbai

**Dr. Santosh Waigankar**

Consultant, Uro-Oncology, Kokilaben  
Dhirubhai Ambani Hospital, Mumbai

**Dr. Kaustav Talapatra**

Director, Radiation Oncologist,  
Nanavati Max Super Speciality Hospital  
Mumbai

**Dr. G.V.K. Reddy**

Sr. Consultant Medical Oncologist,  
Yashoda Hospital, Hyderabad

**Dr. Adwaita Gore**

Associate Director Medical Oncology  
Nanavati Max Super Speciality Hospital  
Mumbai

# Student Education Program on Prostate cancer (STEPP)

One of it's kind Case Simulation with self Assessment based Learning Module

## Module 1: Locally Advanced Prostate Cancer ( LAPC)

**Start date: 19<sup>th</sup> Dec 2021 | End date: 19<sup>th</sup> Jan 2022**

Each 75 minutes Module will be active for 30 days.  
Participants can attend the Module at their convenient time

TIME	TOPIC
7:00 - 7:30 pm	Diving Deep into the Management of Locally Advance Prostate Cancer
7:30 - 7:45 pm	Audience Participation in Case Simulation
7:45 - 8:15 pm	Case Base Discussion (LAPC)

### Steps to complet Module 1: Locally Advanced Prostate Cancer ( LAPC)

- 1 Diving Deep into the Management of Locally Advance Prostate Cancer (Uro-Oncologist prospective)
- 2 Diving Deep into the Management of Locally Advance Prostate Cancer (Radiation-Oncologist prospective)
- 3 Participates in case simulations
- 4 Expert prospective on the case
- 5 Self Assesment
- 6 Download Certificate

Each 75 minutes Module will be active for 30 days.  
Participants can attend the Module at their convenient time

**Module 2 starts on Sun, 16<sup>th</sup> Jan, 2022**

TIME	TOPIC
7:00 - 7:30 pm	Recent Advances in the Therapeutic Management of Metastatic Hormone Sensitive Prostate Cancer
7:30 - 7:45 pm	Audience Participation in Case Simulation
7:45 - 8:15 pm	Case Base Discussion (mHSPC)

**Module 3 starts on Sun, 13<sup>th</sup> Feb, 2022**

TIME	TOPIC
7:00 - 7:30 pm	Understanding the Evolving Treatment Landscape in Metastatic Castrate Resistant Prostate Cancer (mCRPC)
7:30 - 7:45 pm	Audience Participation in Case Simulation
7:45 - 8:15 pm	Case Base Discussion (mCRPC)

**Module 4 starts on Sun, 6<sup>th</sup> March, 2022**

TIME	TOPIC
7:00 - 7:30 pm	Role of Genetic testing in Prostate Cancer
7:30 - 7:45 pm	Audience Participation in Case Simulation
7:45 - 8:15 pm	Case Base Discussion (HRR Mutation)
