

Student Education Program on Prostate cancer (STEPP)

One of it's kind Case Simulation with self Assessment based Learning Module

Module 1 starts from Sun, 19th Dec, 2021

Module 2 starts from Sun, 23rd Jan, 2022

Module 3 starts from Sun, 13th Feb, 2022

Module 4 starts from Sun, 6th Mar, 2022

Every 75 Mins. Module will be active for 30 days.

Participants can attend the module at their convenient time

Module 1 starts from Sun, 19th Dec, 2021

Module 2 starts from Sun, 23rd Jan, 2022

Module 3 starts from Sun, 13th Feb, 2022

Module 4 starts from Sun, 6th Mar, 2022

Dear Colleagues,

In recent years, prostate cancer management has become increasingly complex with new surgical techniques, radiotherapy, and the approval of several second-generation anti-androgen therapies. Moreover, clinical trials of targeted therapies, immunotherapies, and novel combination regimens are underway across various forms of the disease.

These case-based discussions highlight evidence from key trials on next-generation androgen-targeting agents, the role of DNA damage-response mutations, biomarker testing and the potential role of innovative targeted therapy, and advances in immunotherapy for prostate cancer. By providing a "roadmap" to the multiple pathways of prostate cancer management, this program serves as a resource for postgraduate students interested in the present and future applications of new science inpatient care.

Upon completion of this activity, participants should be better able to:

- Develop personalized, evidence-based treatment plans for patients in different prostate cancer settings with considerations of tumor, patient, and treatment-related factors
- Discuss newer advances in surgical and radiotherapy techniques.
- Discuss the clinical outcomes, latest guidelines, and expert recommendations for selection and sequencing of approved therapies, including hormonal, anti-androgen, cytotoxic, and bone-directed therapies, alone or in combination for non-metastatic and metastatic prostate cancers
- Assess the role of genetic testing for treatment decision-making through the prostate cancer disease continuum

Student Education Program on Prostate cancer (STEPP)

Expert Faculty

Dr. Jagdeesh N Kulkarni

Director Minimal Invasive & Robotic Surgery,
Prof & Head, Dept of GU/GYN Oncology,
ACI - Cumballa Hills Hospital, Mumbai

Dr. Tejinder Singh

Sr. Consultant Medical Oncologist,
Apollo Hospitals, Mumbai

Dr. Vivek Venkat

Sr. Consultant - Urology & Robotic Urology
Nanavati Max Super Speciality Hospital
Mumbai

Dr. Santosh Waigankar

Consultant, Uro-Oncology, Kokilaben
Dhirubhai Ambani Hospital, Mumbai

Dr. Kaustav Talapatra

Director, Radiation Oncologist,
Nanavati Max Super Speciality Hospital
Mumbai

Dr. G.V.K. Reddy

Sr. Consultant Medical Oncologist,
Yashoda Hospital, Hyderabad

Dr. Adwaita Gore

Associate Director Medical Oncology
Nanavati Max Super Speciality Hospital
Mumbai

Student Education Program on Prostate cancer (STEPP)

One of it's kind Case Simulation with self Assessment based Learning Module

Module 4: Role of Genetic testing in Prostate Cancer

Start date: 06th Mar 2022 | End date: 06th Apr 2022

Each 75 minutes Module will be active for 30 days.
Participants can attend the Module at their convenient time

TIME	TOPIC
7:00 - 7:30 pm	Role of Genetic testing in Prostate Cancer
7:30 - 7:45 pm	Audience Participation in Case Simulation
7:45 - 8:15 pm	Case Base Discussion (HRR Mutation)

Steps to complete Module 4: Genetic testing in Prostate Cancer

- 1 Role of Genetic testing in Prostate Cancer (Medical Oncologist Perspective)
- 2 Participate in case simulation
- 3 Expert Perspective on the case
- 4 Self Assessment
- 5 Download Certificate
